CERTIFICATION

The fields of application of the multilayer pipes PE-Xb/AL/PE-Xb reported hereinafter are defined by corresponding regulations, which provide:

- maximum operating temperature of **90 ° C**.
- maximum operating pressure of **10 bar**.

The characteristics of the piping systems are specified over a period of **50 years** of continuous operation:

Campo di applicazione	T oper (°C)	Tempo a T oper (anni)	T max (°C)	Tempo A T max (anni)	T mal (°C)	Tempo a T mal (h)
Acqua calda sanitaria (60°C)	60	49	80	1	95	100
Acqua calda sanitaria (70°C)	70	49	80	1	95	100
Riscaldamento a pavimento e radiatori a bassa temperatura	20 40 60	2.5 20 25	70	2.5	100	100
Riscaldamento a radiatori ad alta temperatura	20 60 80	14 25 10	90	1	100	100

Temperature (T oper): operating temperature stated for the scope, expressed in ° C

Maximum operating temperature (T max): value more 'high operating temperature, allowed only for a short period of time

Malfunction temperature (T mal): the more 'high temperature value that can' occur when the control systems are damaged (the period of time allowed for this value and '100 h over a period of 50 years of continuous operation).

All pipes are suitable for the transport of water for a period of **50 years** at a working temperature corresponding to the field of application and an operating pressure of 6 bar.

All tubes are suitable for the transport of water for a period of 50 years at a temperature of 20 ° C and a pressure of 10 bar.
